

POLAR APEX

Multi-Use Survival Bag (MSB)

SPECIFICATIONS

Polar Apex Multi-Use Survival Bag (MSB)

Superior Thermal Imaging Protection

The Polar Apex Multi-Use Survival Bag (MSB) provides unmatched defense against thermal imaging technology, ensuring military professionals remain undetectable. Its advanced construction and materials conceal body heat signatures, granting a strategic advantage in warfare. Made from a proprietary combination of next generation insulating and IRR materials, the MSB will protect the user from a wide range of sensors.

Hypothermia Prevention in Extreme Environments

The MSB's meticulous design and reinforced construction eliminate the risk of hypothermia in hostile regions. Its insulation properties and durability enable military professionals to endure extreme temperatures.

Resilient Weather Protection

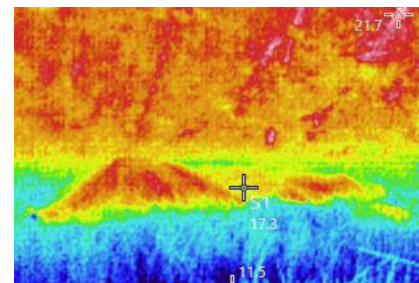

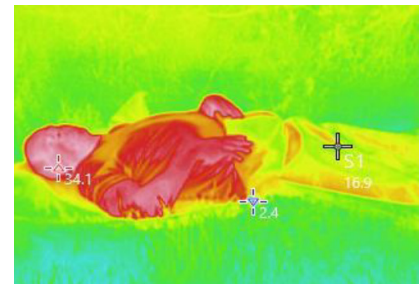

Crafted from cutting-edge insulating and weather-resistant materials, the MSB shields users from rain, snow, and extreme temperatures. It ensures operational comfort and efficiency in unpredictable outdoor environments.

Care for the Wounded

With its exceptional thermal insulation, this bag ensures that injured personnel are shielded from the ravages of harsh weather conditions while receiving vital medical attention or extraction. Hypothermia becomes a distant concern as the MSB provides reliable protection and preserves the well-being of the wounded, even in the most challenging environments.

Width	2100mm / 82.6"
Length	2200mm / 86.6"
Thickness	max. 70mm / 2.7" (thickest part with zipper)
Weight	1840g / 4 pounds

- Multiple different color and pattern options
- Size can be customized to fit user requirements
- Vehicle and weapons system adaptations available
